CURRICULUM VITAE

I'm a developer with a genuine passion for programming and software development. After completing a full stack coding traineeship with IT Career Switch, I've continued designing, building, and shipping full-stack projects independently -- including designing my own scheduling algorithm from scratch -- to keep extending my skills with modern tools such as Next.js, React, and TypeScript. I'm now looking for a junior developer role where I can bring this hands-on project experience into a professional team.

PERSONAL DETAILS

NAME: Chibuikem Daniel Onwu-Obi
RESIDES: Milton Keynes
RIGHT TO WORK: Pre-Settled Status

CONTACT DETAILS: (M) 07831103533 | (M) 07553118300
(E) chibuikemonwuobi23@gmail.com
(W) https://chibuikemonwuobi.co.uk/
(GH) https://github.com/DanielObi23/
(LI) https://www.linkedin.com/in/chibuikem-daniel-onwu-obi-bb963a329/

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js, TypeScript, TailwindCSS, shadcn/UI, Bootstrap

Backend: Node.js/Express.js, PHP, PostgreSQL, MySQL

Tools: Git, GitHub, Vercel, Supabase, Clerk, Zustand, JSON, REST APIs

Other: API integration, responsive design

PROJECTS

Smart Scheduler (personal project):

Technology: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Drizzle ORM, Neon Postgres, Neon Auth, Vitest
URL: https://smart-scheduler-alpha.vercel.app/sign-in
GitHub: https://github.com/DanielObi23/smart-scheduler

- Designed, implemented, and tested an original task-scheduling algorithm from scratch (priority ranking plus interval-merging bin-packing) that automatically slots tasks into a calendar around fixed commitments and daily capacity.
- Used Claude Code to build the full-stack application around the algorithm: Next.js App Router UI, Drizzle ORM/Neon Postgres data layer, and Neon Auth authentication.
- Wrote a committed Vitest test suite covering the algorithm, including a 2000-run randomized fuzz test and targeted regressions (DST-transition handling, starvation prevention).
- Built a fully responsive, mobile-first UI with light/dark themes and Calendar, Board, Timetable, and Overdue views.
- Deployed on Vercel with a public live demo.

FluentRoam (personal project):

Technology: Next.js 15/React 19, Tailwindcss, Shadcn/ui, Zustand, Clerk, Supabase, Groq
URL: https://fluentroam.chibuikemonwuobi.co.uk/
GitHub: https://github.com/DanielObi23/FluentRoam

- Built a Spanish language learning app to practice reading, writing, listening, and speaking.
- Integrated AI, Vapi for real-time communication practice, and Groq for feedback and story generation.
- Integrated translation with both Azure translate and DeepL translate API.
- Implemented persistent storage with Zustand.
- Implemented secure authentication with Clerk, for both development and production instance
- Deployed on Vercel.

FocusFlow (personal project):
Technology: React (TypeScript), TailwindCSS, DaisyUI, Node.js, Express.js, PostgreSQL (Neon), AWS S3, JWT, Arcjet, Claude API
URL: https://focusflow-4ss7.onrender.com/
GitHub: https://github.com/DanielObi23/FocusFlow

- FocusFlow is an AI-powered skill learning path generator that creates structured, step-by-step roadmaps for mastering new skills.
- Built a full-stack application with secure JWT authentication, PostgreSQL database integration, and AI-powered path generation using Claude API.
- Implemented protected routes, cookie-based session handling, rate limiting and bot protection with Arcjet, and profile image storage via AWS S3.
- Designed a relational database schema with Neon serverless PostgreSQL and built RESTful APIs for managing user skills, work experience, and learning paths.
- Deployed backend and frontend using cloud hosting platforms with environment-based configuration.

The two projects below are the development briefs I completed with IT Career Switch, which can be found in my bio: https://chibuikemonwuobi.co.uk/

Company Directory:
Technology: HTML, CSS, JavaScript/Jquery, Bootstrap, PHP, MySQL
GitHub: https://github.com/DanielObi23/chibuikemOnwu-Obi/tree/main/project2

Full project cycle: Formal proposal followed by the development of a company personnel database application using Bootstrap, JavaScript (jQuery), PHP and MySQL. Sign off obtained after demonstrating that all of the required functionality was present and working as intended through the preparation of a formal test script.

Gazetteer:
Technology: HTML, CSS, JavaScript/Jquery, Bootstrap, PHP
GitHub: https://github.com/DanielObi23/chibuikemOnwu-Obi/tree/main/project1

Developed a map-based application in HTML, CSS, JavaScript (jQuery) and Bootstrap presenting geographical and demographic data from JSON returned by PHP modules that query third-party APIs such as GeoNames and OpenWeather.

EDUCATION:

Oct 2024 - May 2025 — **IT Career Switch**
During this time, I studied coding and completed two development projects (Company Directory and Gazetteer) to build practical, real-world experience with these technologies.

2021 – 2024 — **Denbigh**
Three A-Levels (B – C)
Seven GCSEs (Grade 5 – 9)
